

CALL FOR TECHNICAL PAPERS

Canadian Energy Technology & Innovation (CETI) is a new peer-reviewed technical publication for the Canadian Petroleum Industry. The magazine is directed at Canadian energy industry participants, however, this does not exclude related disciplines from participating in our publication. The magazine has a commitment to encourage the continued growth in energy innovation in Canada and to document existing and new technologies in the industry. CETI, through its content, will be a medium to inform members of the energy industry and will encourage interaction among energy business participants.

CETI is published by a non-profit organization whose mission is to promote new innovative technologies in the Canadian energy industry by publishing technical manuscripts for review and discussion by industry members.

CETI invites individuals who are involved in any petroleum-related discipline to submit technical papers for our peer-reviewed publication. We are specifically seeking manuscripts that focus on advances in technology from all fields regarding petroleum energy in Canada.

We welcome full papers for peer-review as well as fully developed abstracts that provide a solid premise for a technical manuscript.

The magazine will cover a wide spectrum of topics that relate to energy and will include technical research areas. These topics include, but are not confined to the following areas:

- Biofuels in Energy Production
- Bitumen Upgrading
- Carbon Capture & Storage
- Clean Petroleum Energy Technology
- Cold Heavy Oil Production
- Completions & Evaluations Strategies
- Computer Applications & Modelling in Petroleum Energy Exploration & Recovery
- Conventional Heavy Oil Technology
- Energy Regulations, Management & Economics
- Enhanced Oil Recovery
- Environmental Solutions for Energy Development & Applications
- Formation Evaluation
- Non-Conventional Recovery of Hydrocarbons
- Optimization Techniques in Petroleum
- Petroleum Energy Policies & Regulation
- Petroleum Energy Reliability & Security
- Petroleum Energy Research
- Petroleum Energy Transportation Issues
- Reservoir Fluid Characterization
- Sustainable Management of Petroleum Production
- Thermal Recovery Methods
- Water Management in Relation to Petroleum Recovery & Production

All the papers accepted in CETI's peer-review process may be eligible for publication in future issues of the magazine.

All paper submissions will be handled electronically. Authors should email their paper and/or detailed abstract to publication@ceti-mag.ca.
